EDUCATION

Maharaja Surajmal Institute of Technology: **B.Tech - Information Technology** (2022-2026)

Current SGPA: 9.2/10

EXPERIENCE

DecisionsLab — Software Engineer Trainee

March - September 2026 | Bangalore, India

- Engineered 40+ client-specific document templates using **Mustache.js**, HTML, and dynamic data binding, enabling configurable meeting workflows and enterprise-specific document generation.
- Built and piloted a Guest Presenter Minutes export pipeline across 3 enterprise tenants using **Angular**, **TypeScript**, **HTML DOM processing**, **DOCX/OpenXML parsing**, and **PDF generation** to isolate agenda-specific content while preserving customer-specific headers, footers, branding, and page layouts.
- Refactored **GPT-4o** streaming-based message generation into a localized **Angular/TypeScript** template using TranslateService and **RxJS**, eliminating AI-credit dependency, streaming complexity, and unnecessary API calls across 5 supported languages.
- Resolved 20+ production issues using **Angular**, **Azure Application Insights**, **KQL**, **API tracing**, and **log analysis**; performed root-cause analysis across frontend, backend, and Microsoft Graph integrations to improve application reliability.
- Delivered 15+ customer-requested features in collaboration with PMs, Customer Success, QA, and engineering teams, contributing across development, defect verification, **CI/CD deployments**, and production releases.

CodeMarks Pvt. Limited — SDE Intern

January – March 2025 | Bangalore, India

- Implemented and delivered 25+ full-stack features using **React.js**, **Node.js**, **MongoDB**, **trPC**, and **Tailwind CSS**, contributing to core product workflows across 10+ application modules.
- Designed and developed 15+ reusable UI components and interactive modals, improving consistency and accelerating feature development across teams.
- Optimized API data fetching by reducing redundant requests and improving dashboard responsiveness across all devices.

RYM Grenergy Solutions — Frontend Developer Intern

June – August 2024 | Noida, India

- Developed a fully responsive news portal using **React.js** and **REST APIs**, building 10+ dynamic sections and enabling real-time content updates through API-driven workflows.
- Redesigned and enhanced the magazine homepage in **Figma**, introducing 5 custom sections and improving content organization, navigation, and accessibility.

PROJECTS

Flood Detection System

- Developed an automated flood detection and inundation mapping system for India using the **Prithvi-600M foundation model** with **Sentinel-1** and **Sentinel-2** satellite imagery, integrating outputs with **QGIS** for disaster impact analysis.

SKILLS

Languages: C, C++, Python (Basic), Java (Basic), JavaScript, TypeScript

Frameworks/Tools: Angular, React.js, Node/Express.js, MongoDB, SQL, Azure, Git/GitHub, REST APIs

CS Fundamentals: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

ACHIEVEMENTS/EXTRACURRICULARS

- Awarded **three Gold Medals** for achieving **the highest GPA** in the 2nd, 5th and 8th semesters.
- Finalist at SRM4.0** Hackathon and participated in 10+ others, including national-level competitions.
- Co-organized **CodeKshetra** and **HackAvenesis** hackathons, while serving as **Head of Sponsorship** for the Debating Society.
- Contributed to the **IEEE MSIT Web Development Committee** and **E-Cell MSIT Technical Team** as a web developer.
- Earned **5-star** ratings in C++, SQL and DSA on HackerRank.
